WWW.CLINIXHEALTHCARE.COM

We identify complex healthcare cases earlier so they can be aggressively managed to improve patient outcomes at substantially lower costs.

These cases typically involve high costs, anticipated complications or serious diagnoses such as cancer, transplants and AIDS.

The Clinix Specialty Case Management program handles:

- High-risk pregnancies, to avoid preterm labor and promote a healthy mother and baby
- Timely discharge of stable premature infants
- Early intervention for pediatric congenital disorders, cerebral palsy, cystic fibrosis, hemophilia and other childhood conditions
- Rehabilitation for brain and spinal cord injuries, stroke, orthopedic procedures and work-related injuries
- A review of services for speech, occupational and physical therapies, including discount negotiations
- A review of medical equipment needs

Additionally, we provide medical/surgical, transplant, mental health/substance abuse and hospice case management.

GET CASE MANAGEMENT REPORTS Clinix supplies standard Initial Assessment Reports, Interim Status and Final Status Reports summarizing the patient's clinical assessment and current status; healthcare services; educational needs; cost savings impact; and intensity and duration of planned services.

We provide an initial clinical assessment within 30 days of referral, based on contact with the provider and patient. Interim reports are provided monthly, and a final report when the case is closed.
